## Experience

California State University, Fullerton

Graduating project

January 2020 - April 2020 (4 months)

United States

To enhance customers' satisfaction, I implemented new features in an e-commerce platform based on Saleor, an open-source (<https://github.com/mirumee/legacy-views>).

"quick-view" on product list page by hovering mouse on image

"zoom-image" for the detailed viewing product image

create a recommended engine for "recommended items"

"wishlist" and some more features

Adivic

Software Engineer

September 2013 - March 2018 (4 years 7 months)

Taiwan

Embedded software design, implements algorithm software and user-interface design and development, testing, and debugging. Assist in the definition of design specifications and parameters, development, and application of major routines and utility programs. Assist in the analysis and investigation of major software engineering project tasks. Known for troubleshooting skills.
